As a special service to members of the American Nature Association and readers of Nature Magazine, we are bringing out from time to time in attractive bulletin form some of the articles whose unusual value and permanent worth seem to warrant special attention. Among the bulletins already available are: "The Rose, Queen of Flowers," by Dorothy Pletcher, which appeared in March Nature Magazine; "Enjoy the Luxury of a Weedless Lawn", by Albert A. Hansen, and "Tree Flowers—Their Story", by Mary F. Robinson, both in the April number; and "Peony, The Flower Beautiful", by Dorothy E. Pletcher, one of the feature articles of May. Mr. Preble's article, "Our Disappearing Fur-Bearers" is also ready for distribution, upon request.
